## Summary

Final-year B.Tech Computer Science student (2026) with strong knowledge of Data Structures, Algorithms, and Object-Oriented Programming. Experienced in software development, backend systems, and machine learning projects. Proficient in writing efficient code and solving complex problems.

## Skills

**Programming Languages:** Java, Python, SQL
**Core Computer Science:** Data Structures and Algorithms, OOPS, OS, Database Management System
**Web & Backend:** JSP, Servlets, Node.js, Express.js, React.js
**Databases:** MySQL
**Tools:** Git, GitHub, VS Code, Eclipse
**Core Competencies:** Analytical Thinking, Debugging, Problem Solving

## Education

**Amity University, Kolkata** — **2022 – 2026**
*B.Tech, Computer Science & Engineering* — *CGPA: 8.01 / 10*

**Kendriya Vidyalaya Kunjaban**
*HSC: 73.5%    SSC: 88.17%* — ***2020 – 2022***

## Experience

**AI/ML Intern** — **June 2025 – July 2025**
*National Informatics Centre* — *Python*
- Developed an LSTM-based OCR system using a curated dataset of 10K+ samples.
- Performed model validation on 500+ test cases, improving prediction accuracy and reliability.

**Software Development Intern** — **May 2025 – June 2025**
*Oil and Natural Gas Corporation (ONGC)* — *React.js, Node.js*
- Built a web-based monitoring dashboard handling 5K+ operational records.
- Improved system processing efficiency by 30% through optimized backend logic.

**Business Application Development Intern** — **Nov 2024 – May 2025**
*HealthOK Global Inc. (Remote)* — *SQL*
- Analyzed and managed 50K+ structured records using SQL queries.
- Reduced manual validation effort by 35% via QA automation workflows.

## Projects

**Online Job Portal**
*Java, JSP, Servlets, MySQL*
- Implemented a role-based authentication and session management using Java and Servlets.
- Designed relational database schema with multiple entity mappings (users, jobs, applications)
- Improved database performance by 25% through query optimization and indexing.

**Monkeypox Detection System**
*Python, TensorFlow, OpenCV*
- Developed a Convolutional Neural Network model achieving 95.55% classification accuracy.
- Applied data preprocessing and hyperparameter tuning to enhance model performance.

## Certifications

Database Management System – IIT Kharagpur (NPTEL)
Credit-Linked Program in Data Science – IIT Guwahati (Ongoing)
